DETAILED ACTION
EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Diane Dunn McKay on august 23, 2010.

The application has been amended as follows:

Please amend Claim 4 as follows:

Claim 4. A process for preparing cooked rice in an aseptic package which comprises the sequential steps of:

washing long grain rice with only purified water[.];

soaking the long grain washed rice with the purified water and with a first solution of emulsified oil for two to three minutes, said emulsified oil is selected from glycerin fatty acid ester, D-sorbitol fatty acid ester, polyglycerin fatty acid ester, propyleneglycol fatty acid ester and ilshin ester;

removing the purified water from the long grain rice;

filling the soaked long grain rice automatically in a heat-resisting plastic container;

repeating 4 to 10 times sterilization of the container filled with the long grain rice by [~~intermittently~~] applying high pressure steam at a temperature of 130°C-150°C and for 4 to 8 seconds each time;

making a second solution of emulsified oil;

adding [~~an amount of a~~] half of the second solution of emulsified oil to the sterilized rice before [~~a~~] the step of cooking the rice;

cooking the long grain rice with [~~a~~] said half of the second solution of emulsified oil as a liquid for cooking; and

adding ~~[the same amount of the]~~ the remaining portion of the second solution of emulsified oil to the cooked long grain rice, and

hermetically sealing the plastic container under aseptic conditions and packaging the resultant cooked rice.

Please amend the abstract as follows:

Please start the text of lines 5-12, beginning with the words "More particularly" on line 4 after the words "smooth mouthfeel. " so that the abstract consists of one paragraph.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Applicant's arguments, discussed in the remarks filed June 23, 2010 with regards to the prior art rejection have been fully considered and are persuasive. The 103(a) rejection of claim 4 has been withdrawn. The closest prior art of record, Komatsu and Meyer do not teach or suggest the instantly claimed method. Specifically none of the prior art references teach or suggest the claimed sequential method steps, including the step of soaking the long grain washed rice with the purified water and with a first solution of emulsified oil for two to three minutes, wherein the emulsified oil is selected from glycerin fatty acid ester, D-sorbitol fatty acid ester, polyglycerin fatty acid ester, propyleneglycol fatty acid ester and ilshin ester; multiple sterilization steps, wherein the container is later sealed; and adding half a solution of emulsified oil to the rice before and after cooking.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
